Summary

As a Junior Quality Assurance professional, I've honed my skills in meticulously analyzing and enhancing product quality. Through rigorous testing methodologies and insightful feedback, I've contributed to the refinement of processes and the delivery of top-notch software solutions. My commitment to staying updated with emerging trends and technologies ensures that I bring fresh perspectives to the table, fostering a culture of continuous improvement. With a solid foundation in QA principles and a passion for excellence, I am poised to make significant contributions to any team.

Skills

- Java
- Selenium Automation
- Appium
- Postman
- Rest Assured
- Jmeter
- Testcase Writting
- Accessibility
- Testcase Execution
- Bug Reporting

Experience

Junior Quality Assurance - 06/2023 to Present

Knowledgeq interactive consultancy services, Coimbatore

- Developed automated test scripts with Selenium, reducing manual testing time by 40%.
- Conducted regression testing to identify and resolve software defects.
- Collaborated with cross-functional teams to ensure web and mobile application quality.
- Executed test cases, documented results, and reported bugs.
- Participated in daily stand-ups and sprint planning for Agile practices.
- Assisted in creating test plans, cases, and data for new features.
- Used various testing tools to enhance processes and coverage.
- Suggested improvements to testing strategies and team processes.

Projects

- **Fingertip - Fintech application**

I ensured the quality of Fintech web and mobile applications through comprehensive manual and automated testing. I developed and executed test cases, identified and tracked defects, and implemented automated test scripts using tools like Selenium and Appium. I created reusable automation frameworks to support various types of testing, including functional, regression, and performance testing. I also collaborated with cross-functional teams, conducted performance and security testing, and contributed to achieving industry compliance.

- **Dv Training - Learning application**

In this project, I performed quality assurance for a learning platform web and mobile application. I meticulously tested the platform's functionality, usability, and reliability through manual and automated testing, including API testing. I developed and executed test cases, identified and tracked defects, and collaborated closely with the development team to ensure a high standard of quality.

- **HMH - Ebook learning**

In this project, I served as a QA role for an Ebook learning application, focusing on accessibility testing, content checks, and functionality verification. I meticulously tested the application to ensure it met accessibility standards, verified the accuracy and integrity of the content, and conducted comprehensive functionality checks. Through thorough testing, defect identification, and collaboration with the development team, I contributed to delivering a high-quality Ebook learning application that provided an accessible and seamless learning experience for users.

- **Pdf to HTML**

In this project, My responsibilities included testing the functionality and content accuracy of the conversion process. I meticulously tested the HTML output to ensure it maintained fidelity to the original PDF while verifying that all functionalities were preserved. Through rigorous testing and collaboration with the development team.

Education

- Bachelor of Science: **Information Technology** – 2019 to present
The American college, Madurai.
- Higher Studies: **Computer Science & maths** – 2018 to 2019
Al-Ameen Muslim Hr. sec School, Madurai
